7th March 2023

Dear Parents and Carers,

10-19 March
British
Science
Week
2023

We are celebrating **British Science Week** at school next week with some fun Science activities as well as joining in with some live online lessons.

The British Science Association are also holding a **poster competition** to celebrate this year's theme which is '**Connections**'. There are loads of STEM topics (science, technology, engineering and math) that could be explored! How about exploring how our body parts are all connected and work together, the connection between our actions and the impact on our environment, or even how internet connection has changed the world. I know you will all have lots of amazing ideas of your own!

Posters can be made by an individual or a group and must only be on one A4 or one A3 piece of paper.

The judges will be looking for:

- Creativity in approach – Innovative angle on the content or creative interpretation of the theme
- Content – Clear, accurate and informative about a STEM topic
- Effective communication – presented and communicated in an engaging way

Members of the British Science Association will shortlist entries and a panel of judges will select a winner in each category. The organisers of the national competition have some exciting prizes this year including: a 3D information book, an animal adoption pack, family ticket to Brooklands Museum, space-themed prizes and an experiment book set!

Entries must be brought into school and given to me via your class teacher by the end of **Friday 24th March**. We will judge them in school and then submit the winning entry for each category.

Please see last year's winners overleaf.

I hope you enjoy creating your posters and I cannot wait to see your entries!

Miss Taylor
